Vegetable Men To Meet Miami Beach On October 9th

Dr. J. Wayne Reitz, President of the University of Florida, will present the Annual Research Awards of the Florida Fruit and Vegetable Association at the convention of the Association at Miami Beach, on October 9, according to an announcement by Roy Vandegrift, Jr., Convention Chairman.

"Dr. Reitz has accepted our invitation to present our research awards during the opening business meeting," Vandegrift said.

"These are awards made annually to research workers for outstanding contributions to the vegetable and subtropical fruit industries of Florida."

"The eligibility requirement makes the awards open to all individuals engaged in any type of scientific research which makes a contribution to the production and marketing of vegetables and subtropical fruits in the state, including persons employed by governmental agencies, private universities, companies, institutions or self-employed."

"Last year four awards were made. Those receiving were: Emil A. Wolf, Associate Horticulturist, Florida Everglades Experiment Station, Belle Glade, Florida; Fred Andrus, Horticulturist, U. S. Southeastern Vegetable Breeding Laboratory, Charleston, South Carolina; C. M. Geraldson, Assistant Soils Chemist, Gulf Coast Experiment Station, Bradenton, Florida; and George D. Ruchle, Vice-director, Subtropical Experiment Station, Homestead, Florida," Vandegrift said.

Teacher Changes At Belle Glade

Major changes in key personnel of the South Bay and Belle Glade schools were made at a recent School Board meeting, according to Chairman H. O. Earwood.

Mrs. J. W. Mosley, who has been on the elementary school faculty since 1946 and has been assistant principal since 1951, has been appointed area supervisor for elementary and junior high school work in the Glades area. She will also deal with migrant education problems.

Mrs. Mosley will be succeeded as assistant principal at Central Elementary School by Pella Morris, who has been principal of the South Bay School for the past five years. The post of Principal of the South Bay school was given to Charles E. Godwin, who has been a junior high school instructor and junior high school coach for the past seven years.

Principal Frank O. Hobson also announces that only two vacancies remain to be filled on the Belle Glade High School faculty, following the recent appointment of five new teachers. The new appointees are: Martin Hurdle, Paris, Tenn., social studies and junior high school math; Jack High, Oklahoma, senior high math; Vince Marquess, Owensboro, Ky., assistant coach and social studies; Richard Payne, industrial arts, and Fred Stevens, Belle Glade, music.

Date Is Set For Pupil Registration

Pahokee and Canal Point school teachers will report for duty at their schools on Monday, Aug. 19, for a series of daily meetings to prepare for the opening of school the last of this month.

The registration of pupils at both schools will take place on Wednesday, Aug. 28. The first day of school will be on Friday, Aug. 30. There will be no school on Labor Day, Sept. 2, however, on Tuesday, Sept. 3, the fascinating, but oftentimes frustrating, work of impressing impressionable, youthful minds to various fields of knowledge will get under way in earnest.

Cow Institute Is Scheduled Aug. 20 For Lake Placid

LAKE PLACID—Feeding practices as followed by five of the state's leading cattle feeders will highlight the program of the fourth annual Cattleman's Institute to be held at Camp Cloverleaf, Highlands County, August 20. Each man will give the story of feed practices and feeding problems used on his ranch. The men are J. O. Pearce, Jr., of Okechobee, Dallas Dort of Sarasota, J. O. Carter of Palmetto, G. A. Ferguson of Ocala and Richard Kelly of Stuart.

This will be a feature of the morning session which begins at 9:30 and which will be presided over by J. E. Pace, animal husbandman with the Florida Agricultural Service. The other morning feature will be a report by Extension Agronomist J. R. Henderson of results of research on cost of fertilizing forage and grain crops.

At noon a barbecue lunch will be served by the Highlands County Cattleman's Association. An hour of the afternoon will be devoted to a discussion of pasture irrigation by W. H. Kendrick, county agent of Palmetto, L. H. Stewart of the Soil Conservation Service and Dallas Dort, Sarasota rancher. The panel will be moderated by St. Elmo Dowling of the Extension Service.

Other afternoon topics will be on herd improvement through record keeping by Max Hammon of Bartow and a look at plans for the future by J. E. Pace.

Ladies Plan For Trip Thru West

Miss Julia Mathis and Mrs. M. P. Stanley left this weekend on a tour of Texas, Arizona and the Rocky Mountain States. Enroute they plan to visit relatives and friends in Panama City, New Mexico, Texas and Arizona, including Mrs. Stanley's son, Lt. Millard Stanley, who is stationed by the U. S. Air Force at Albuquerque. They also plan to visit the Grand Canyon and Yellowstone National Park where they will be joined by Miss Mathis's niece, Miss Annette McIntosh, who has been employed at the park this summer and will accompany them home. They are being accompanied on the trip also by Miss Mathis's nephew, William Corbin, of Fort Myers.

All In Readiness At Pahokee School

With eight new teachers joining the Pahokee High School faculty and one joining the Elementary School faculty the teaching staffs at both schools are now complete and everything is in readiness for the opening of school, according to Brooks Henderson, new principal of Pahokee Schools.

One new course of study, industrial arts, has been added to the high school curriculum. Vance D. Denton, a Pahokee High School alumnus and a former member of the high school faculty at Fort Arthur Texas, has been employed to teach this course. For the past few years Mr. Denton has been engaged in the insurance business at Pahokee. A new industrial arts shop was built on the campus this summer and the necessary equipment for the teaching of the course is now being installed under Mr. Denton's supervision.

The other new instructors on the high school faculty are R. W. Hood of Huntington, Tenn., senior high mathematics; Robert Maxson of College Park, Ark., junior high English; Kyle Scott, transferring from the Canal Point School, driver training education; Mrs. Rita Sims, returning after a leave of absence, girls' physical education director; Don Spivey of Sarasota, senior high English and Spanish; R. W. Whiteside of Winchester, Ky., sciences; and Mrs. Phara Morris of Maine, senior high English and Latin. Mrs. Morris, the former Phara Mock, is returning as a teacher in Pahokee Schools after an absence of several years.

Miss Frances Wilson of Canal Point, a Pahokee High School alumna, and 1957 graduate of Florida State University, is the only new teacher joining the Elementary School faculty. She will teach one of the sections of the First Grade.

Sprucing up activities on the campus during the summer included the redecorating of the interior of all the rooms in the elementary school building, the addition of a new men's lounge at the high school building, the redecorating of the school offices and the addition of a new office counter, the sanding and re-varnishing of the floor of the school auditorium.

Co-Op Barbecue As Usual Is Excellent

Members of Lake Okechobee Farmers Cooperative and their families gathered at the Community Park on Monday, Aug. 5, for their annual barbecue picnic. To say that the barbecue was good is putting it mildly—it was, as usual, excellent. All of the trimmings, prepared by the wives, hit the spot and those in attendance commented that it was once again one of the outstanding get-togethers of the area. Officials and members of the Co-Op were official hosts for the occasion.

Mrs. Dave Lovell and granddaughter, Natalie Hyatt, will return this week from a visit with Mrs. Lovell's daughter, Mrs. Joyce Hyatt, at Cocoa.

ON VACATION

If there seems to be a shortage of live news in this week's paper, think nothing of it—we're on vacation. Postal laws say that we must issue a paper every week, so we are living up to the letter of the law. When you read this particular issue The Everglades News force hopes to be taking it easy—fishing—visiting—resting. On August 25, we'll be back in the harness, full of energy, pep and all those things that go to turning out an excellent newspaper. In the meantime, don't phone—'cause the office is CLOSED.

1500 Gallons Aqua For Each Person In America Daily

For every person in the United States there are 1,500 gallons of water used every day. The total daily national consumption of water would float the merchant fleets of the world. According to information released by Central and Southern Florida Flood Control District, this consumption is creating a water problem which has been the subject of legislative action at both the State and National levels during this year.

In Florida, the department of water resources was created in the Board of Conservation during the recent legislative session. Under this Water Resources Law, the maximum beneficial utilization, development and conservation of Florida water resources will be safeguarded. The agency will cooperate with the Florida geological survey, the Flood Control District, and other agencies to determine how the purposes of the law, can best be achieved.

At the Federal level, the Senate has noted that increases in population and expansion of the economy require careful planning and coordination of the Nation's water resources of the Nation.

Water conservation has taken on new importance as both industry and agriculture compete for its use. For example, the steel industry uses 65 thousand gallons of (continued on page 8)

Vacation School Ended Wednesday

The Vacation Church School at the Pahokee First Methodist Church, which had "Wider Horizons" as its theme this summer, was brought to a successful conclusion on Wednesday night with a series of activities.

Starting at 6:30 p. m. a sandwich supper was served to the children who attended the school and their teachers, by members of the Gertrude Shirley Circle of the Woman's Society of Christian Service, who acted as hostesses. Following the supper the entire school group attended prayer services which were conducted in the church sanctuary by the Rev. Wayne Owens, pastor.

After the services there was an open house during which parents and friends were invited to inspect the work accomplished by the children at the school, which was on display in the educational building.

Dedication Plans For New Armory At Belle Glade Okeh

Plans for a formal dedication of the new \$196,000 National Guard Armory at Belle Glade which passed inspection by officers of State headquarters in St. Augustine, have been tentatively set for Aug. 25, according to Lt. Joel Bass, commander of the unit at Belle Glade.

County Commissioner Paul Rardin, of Canal Point will be master of ceremonies and the tentative guest speaker will be Gen. Mark W. Lance, state adjutant, Lt. Col. Oliver W. Hartwell, Battalion commander, of West Palm Beach will present the unit with a State flag.

The ceremonies will open with a band concert by the 51st Division Band set for 2:00 p. m., followed by the dedication ceremony at 3:30 p. m. Open house has been set for 4:30 to 7 p. m.

Although the building has been approved, landscaping of the grounds surrounding the armory, located about one half mile south of Belle Glade, on SR 80, will take about another month. The formal inspection was made by Col. Ralph W. Cooper, state quartermaster, Col. Julian Pfaff, U. S. property and fiscal officer, the architect and builder, David B. Scoville, West Palm Beach, was the architect. Contract for construction of the armory was awarded by the State Cabinet last Nov. 13 to Hugh F. Palmer, Hollywood, on a bid of \$186,865.

Vandegrift Names Committee Heads For October Meet

Roy Vandegrift, Jr., Pahokee, General Chairman for the coming Convention of the Florida Fruit and Vegetable Association has announced appointments of committee chairmen including growers of this area.

The 3-day meeting of the growers and shippers of Florida's vegetables and tropical fruits will be the 14th Annual Meeting of the group. It will open on October 9 at Miami Beach.

Appointed were: J. R. Brooks, Homestead; Luther Chandler, Goulds; John W. Evans, Oviedo; W. J. Flora, Perry; William Graber, Belle Glade.

Also L. B. Gravely, Newberry; J. P. Harlike, Palmetto; Harold Kastner, Sanford; Dixon Pearce, Miami.

Also Walter Peterson, Goulds; Cola Streetman, Vero Beach; and George Wedgworth, Belle Glade.

President Rudolph Mattson, Ft. Pierce, will preside at the opening session and at the corporate business meeting.

Miss Nancy Wallace of Ames, Iowa, has arrived in Pahokee for a visit with her uncle and aunt, Mr. and Mrs. G. Eryan Ramey, and cousin, Miss Phoebe Anne Ramey. Miss Wallace, a Sophomore at Iowa State Teachers College, will serve as one of Miss Ramey's bridesmaids at the Ramey-Miller nuptials in the Pahokee First Methodist Church Sunday, Aug. 25, at 4 p. m.

Cinematic Chatter

By Malcolm Millar

Hello everybody! After breaking through enemy lines during wartime at the age of nine to smuggle messages to allies, breaking into show business at the age of nineteen was easy for Nelle Adams. Fifteen years ago, however, Nelle considered herself lucky to be alive. Her husband, the Philippines, had been invaded, and to survive tiny Nelle had to scrounge for food while working with the underground. "I was a child and I spoke five languages," she relates. "Children were never searched. So it was my job to carry notes from one detachment of guerrillas to another. Then they discovered that my father was English, so I was sent to camp for the next two years. "Camp" was a concentration camp just outside of Manila, and it was there Nelle saw the end of World War II. Her mother, who dealt in the sale of surplus war equipment, came to New York to start an import-export business, and Nelle attended the Marjorie Webster Junior College. "I don't know why, exactly," she says, "But in 1951, after college, I decided I'd like to be in show business. I had no experience. I had never studied. I couldn't sing or dance. But I've always had a tremendous imagination and have always been a good mimic. I've been a movie fan as long as I can remember. I go to movies and then copy the poses of the actresses at home. I saw film after film, hoping some of the talent of the stars would rub off. "After jobs as secretary and a model, Miss Adams enrolled at a Katherine Dunham school of dance. At the same time she studied with the American Theatre Wing, came to Hollywood, did bits in several pictures and then got the big break in "Pajama Girl." Miss Adams, now firmly established as a star is rapidly going up in TV and the movies. See you at the movies—Mal.

Beekeepers To Hold Initial Institute At McQuarrie Aug. 15-17

GAINESVILLE—An opportunity for Florida beekeepers to compare notes and be brought up to date on the latest developments in the business will come August 15-17 when the state's first Beekeepers' Institute will be held at Camp McQuarrie, Astor Park.

John D. Haynie, apiculturist with the Florida Agricultural Extension Service, says the event is jointly sponsored by the Extension Service and the Central Florida Beekeepers' Association, which conceived the idea.

Exhibits of beekeeping equipment will supplement the well-rounded program of discussions which cover all major phases of apiculture. Trained recreation leaders will be provided for swimming, boating, fishing and games.

Reservations accompanied by a check for \$5.00 for each person attending should be mailed to John D. Haynie, Agricultural Extension Service, Gainesville. That amount covers all costs from supper Thursday through lunch Saturday.

In addition to Haynie, the institute staff will include: Millard Coggeshall, president of the Florida Beekeepers' Association; Russell Martin, president, Central Florida Beekeepers' Association; County Agent R. E. Norris of Lake County; District Agent E. S. McMullen of Gainesville; and Ray and Betty Bailey and Dorothy Fraser, recreation leaders from Lake County.

Ross Allen, of Silver Springs fame, and William Fuller, popular Florida author, are featured in the Warner Brothers color film, "Deep Adventure."

Havana, which is just 4 hours away from New York via Cubana Airlines, is presently undergoing a building boom which rivals the lush post-war days of Miami Beach.

From where I'm sittin'... by Joe Marsh

Age and Wisdom

Mac Johnson's mother just moved near one of them big airports, and Mac was concerned about her gettin' enough sleep at night. Seems like the planes start takin' off about one o'clock in the morning, one every two minutes for an hour and a half... makes an awful racket.

Mac asked his mother about it bothering her sleep the last time we were over there. "Yes," she told him, "They do bother me. The trouble is they take off so fast I hardly have time to say a prayer for each one."

Mac and I just looked at each other while she went to get us

a glass of cold beer from the kitchen. As she put it on the table, she remarked, "You know a person can choose to get upset about something or not. It's like drinkin' beer. I don't choose to drink it myself, but I don't mind if other people do."

From where I sit, that kindly attitude will add ten years to her life.

Joe Marsh

Cigar Bowl Plans Being Perfected In Tampa Jan. 1, '58

TAMPA—Tampa's Cigar Bowl football game, with top-flight college teams in action, will be seen again during the 1957 Holiday season.

A group of young football enthusiasts, headed by cigar manufacturer Morton Annis, have been granted a franchise for the game by the National Collegiate Athletic Association and are now planning the Tampa event. Approval by the N. C. A. A. is needed to obtain major teams for post-season games. A two-year wait for the sanction was necessary for the group.

To insure adequate bowl game seating at Phillips Field at the University of Tampa, the New Tampa Cigar Bowl Committee has contracted for additional bleachers which will increase capacity of the field from 12,000 to 18,500. Committee members indicated the

Cigar Bowl game would move to the large stadium of the new state University in Tampa when completed.

Predicting success for the revived football classic, the Committee promised only top-level teams for competition in the annual games. Under the Egypt Temple Shrine's charity plan, in effect from 1947 through 1955, name teams would not participate because of the lack of N. C. A. A. approval. The N. C. A. A. stipulates that 75 percent of gross gate receipts be divided between the participating teams. The resulting financial gain for the Shrine Crippled Children Home did not justify continuation of the game, according to Shrine officials.

Officers of the New Tampa Cigar Bowl Game Committee are: Morton L. Annis, president; Sam Gibbons, Paul Johnson and Larry Guerra, vice presidents; George Hearing, treasurer; William Benson, corresponding secretary; Eddie Diaz, recording secretary; and Joseph R. Mickler, publicity director.

Pangola Hay

You can make good hay from pangola grass — and you won't have to buy a lot of expensive equipment, asserts an expert in the July issue of Florida Grower and Rancher.

Pangola is at its most nutritious stage when it is most easily cured. That's when it's about a foot high and just beginning to form stems.

Rotary mower blade should be just sharp enough to cut, rather than knock over, the grass; but not sharp enough to make a clean cut. The stubble should have a frazzled appearance.

The stem of the cut material, for the most part, will be ripped open. The leaves are shredded somewhat too, making the whole mass fluffy. Length of the hay is somewhat short, but still easily baled.

Few developments can boast of 30 miles of waterfront, but Indian Lakes Estates has four miles of waterfront on one lake and 27 miles on other lakes. The development is located at Lake Wales, prosperous, fast-growing Polk County community.

Pick your savings target and shoot straight for it!

A home . . . financial security . . . a business of your own. Important savings targets like these cost money—a substantial sum—and more than most of us have. But here's a sure way for you to score a bull's-eye and walk off with the big prize you want.

The secret of saving is system. And the simplest, most automatic saving system ever devised is the Payroll Savings Plan. Best of all, you do more than save through Payroll Savings. You invest your money, too, and make it grow. Here's how it works:

Tell your company pay office how much you want to save each week. Then each pay period that amount will be put aside for you before you have a chance to spend it. Your money will go automatically into U. S. Series E Savings Bonds.

Because Savings Bonds earn good interest—3% compounded semiannually when held to maturity (9 years and 8 months)—they're soon worth much more than you've invested in them. And your Bonds will continue to pay this same good interest as long as 19 years and 8 months. That means a return of up to 80% more than you originally paid.

And remember this. There's no guesswork or chance about the Payroll Savings Plan. It's absolutely safe and sure. Invest just \$7.50 a week. In 5 years you'll have Savings Bonds worth \$2053 in cash; in 10 years, \$4448.

Even if you've never been able to save before, this plan is guaranteed to work for you. So sign up today for Payroll Savings where you work—or invest in Bonds regularly where you bank.

For the big things in your life, be ready with U. S. Savings Bonds

The U. S. Government does not pay for this advertising. The Treasury Department thanks, for their patriotic donation, the Advertising Council and

THE VOICE IS MIGHTIER THAN THE SWORD

THE GREAT GUN BOATMAN SCORED HIS FIRST VICTORY OVER THE SPANISH BY A RUSE. HE HAD HIS SCANTY ARMY BEHIND ROCKS, ORDERED THEM TO MAKE ENOUGH NOISE TO INDICATE THEY WERE A GREAT ARMY, AND THEN TALKED THE COMMANDER OF THE FORTRESS OF TENERIFE INTO SURRENDERING TO SUPERIOR NUMBERS!

THAT'S WHAT WE ARE—BECAUSE

WE'RE TELLING MEN ABOUT THE WORLD'S NEWEST METHOD OF SAVING BONDS—AND SAVING SAVINGS PLANS VIA THE PAYROLL WITH A SYSTEM VIA THE PAYROLL TO GIVE YOURSELF A GIFT ON FUTURE SECURITY!

CIRCULAR TIME

ONE OF THE EARLIEST SYSTEMS OF MEASURING TIME WAS THE TREE, CIRCLE AND SHADOW METHOD. CONCENTRIC CIRCLES DRAWN AROUND THE BASE OF THE TREE WOULD ENABLE THE PRIMITIVE MAN TO JUDGE THE TIME BY THE EXTENT OF THE SHADOW!

And now—

DON'T FORGET THAT THE NEW SERIES B BOND PAYS 3 1/4% INTEREST WHEN HELD TO MATURITY! AND IT MATURES EARLIER—8 YEARS 11 MONTHS. GIVE YOURSELF A BREAK AND START BUYING U.S. SAVINGS BONDS NOW!

PERSONAL NEWS NOTES

Mrs. Ann Johnson, who recently returned to the United States after spending a year with her husband, Airman 2-c Leroy Johnson, at Fairbanks, Alaska, is visiting her parents, Mr. and Mrs. J. B. Snyder, and brother and sister-in-law, Mr. and Mrs. Julian Snyder, in Pahokee.

Miss Lulu Barfield left this week for a visit of several weeks with relatives and friends in Orlando, Christmas and the Palm Beaches.

Mr. and Mrs. Archie McGee are expected to return this week from a vacation spent in the Carolinas and Delaware.

Miss Julia Mathis was hostess at the August social meeting of the Pahokee Business and Professional Woman's Club held at her home on Bacom Point Road. A steak barbecue supper was served to members and guests by the hostess.

Mr. and Mrs. Calvin Padgett and infant son, Jimmy, of Gainesville arrived here Wednesday for a two weeks' visit with her parents, Mr. and Mrs. A. H. Scruggs at Canal Point and his parents, Mr. and Mrs. Duncan Padgett, at Pahokee.

Mrs. Ollie Batchelor and her mother, Mrs. Ada Culberson, accompanied by Mr. and Mrs. W. Culberson of West Palm Beach, are expected to return home this weekend from a vacation spent in Georgia, Tennessee and Kentucky, during which they attended the Grand Ole Opry in Nashville and visited Renfro Valley.

Guy W. Sharon left this week on a trip to Arizona and California, and a tour of the Pacific Coast.

Mr. and Mrs. R. O. Lampi and children are expected this week to return from a vacation spent with relatives in Michigan.

Mrs. Pauline Rice and grandson, David Fountain, left this week for a visit with her father, Orin Hughes, who is 87, at his home in Asheville, N. C. They will also visit relatives in Shelbyville, Ky., before returning home.

Mr. and Mrs. C. C. Cobb of Melbourne visited Mr. and Mrs. P. A. Sizemore and other friends here over the weekend and were accompanied here by their daughter, Cheryl, who had been visiting in Pahokee for a week.

Seawall Center Of Controversy In St. Augustine

TALLAHASSEE—The Florida Supreme Court has been asked to determine whether the old seawall on St. Augustine's historic bayfront is an ancient landmark which must be preserved for posterity or if it should be destroyed to make way for an improvement project. The city is planning to four-lane narrow Bayfront avenue between Castillo de San Marcos, the oldest fortress in the United States, and the Bridge of the Lions. Construction of a yacht pier has also been proposed.

A group of taxpayers have contested the plan, however, contending that the seawall is one of the ancient landmarks of the oldest city in the United States and under a mandate from the State Legislature must be preserved as an ancient landmark.

The Supreme Court took the appeal under advisement with no indication given when a ruling would be issued.

ANGLER MISSES WORLD RECORD BECAUSE EXTRA HOOK ON HIS PLUG

Catching the big one is always the dream of every fisherman... including Joe Doliana, Jr. of Florida. And he found his dream on the Hollywood bridge in Florida just a few weeks ago when he brought in a 31 pound 4 ounce giant Snook! Wonderful! ... said everybody. Boy, am I lucky! ... said Joe. Because, up until this time the world record for Snook (on line testing 12 pounds or under) had been 29 pounds.

Then came the catastrophe... somebody checked the rule books and found... "The catch must be made on not more than two double hooks." Poor Joe! He was using a number 708 Creek Club Pike, and his line tested about 10 pounds, but that fish-catching lure had three treble hooks!

Never mind Joe anytime you bring in a fish that size... you've done sumpin'! And just to prove it, his catch has been entered in a Field and Stream contest.

Miss Phoebe Anne Ramey To Wed H. G. Miller August 25

Plans have been announced for the wedding of Miss Phoebe Anne Ramey and Hugh Graham Miller, III, which will be an event at the First Methodist Church in Pahokee Sunday, Aug. 25, at 4 p. m.

Vows for the double-ring ceremony will be read by the Rev. James Edward Statham, pastor of the Floral Park Methodist Church, Miami, a former pastor of the Pahokee Church.

The bride-elect has chosen as her attendants Miss Marcia Jean Guthrie of Tallahassee, a high school classmate, as maid of honor; Miss Nancy Wallace of Ames, Iowa, a cousin, and Miss Patricia Cole of Roanoke Rapids, N. C., roommate at Appalachian State Teachers College, bridesmaids. Hugh Graham Miller, Jr., of Shelby, N. C., will serve as his son's best man. Ushers will be Leon A. Miller, brother of the bridegroom, and Gene Arrowood, his uncle, both of Shelby.

The nuptial music will be presented by Robert O. Lampi, vocalist, and Miss Jill McIlwain, organist, both of Pahokee.

The ceremony will be followed by a reception in the Woman's Club building. No invitations are being sent within the city but all friends of the couple are invited to attend both the wedding and the reception.

Mr. and Mrs. Charles Sears of Lakeland spent the weekend here visiting her parents, Mr. and Mrs. Homer Barnes, in Pahokee and his parents, Mr. and Mrs. H. H. Sears, in Canal Point and were accompanied here by their son, Bruce, who had visited his grandparents for a week.

Mr. and Mrs. O. D. Carpenter and daughter, Miss Carol Carpenter, returned recently from a tour of the Western States.

Water Safety Tips

Drowning, according to the National Safety Council, now ranks second to motor vehicles as the cause of accidental deaths among the active age groups (ages five to 44 years).

Therefore escape tragedy in your family this summer by heeding water safety rules, urges the July issue of Florida Grower and Rancher whose water safety suggestions include:

When swimming, leave all horse-play until you are safe on shore. And don't swim alone—a swimming companion may save your life.

A life jacket for each person in a boat is the first rule of water

safety. Buoyant cushions also provide flotation.

Boating safety tips include; don't overload; use the right motor, head into the waves; balance your load; watch the weather and head for shore before a storm breaks; avoid sharp turns; keep low and step in the center when boarding the boat or changing seats.

If the boat upsets, don't try to swim ashore unless you are very close. Stay with the boat as long as it is afloat; a swamped boat in deep water will safely hold up—for hours—all the people who can gather around it if you know how to handle the boat.

BILL BOOSTER by BOE'S & MATHIS-BOE

It Is Unlawful For Any Person Or Persons To Engage In Business Under A Fictitious Name Unless The Name Is Registered

The fictitious name statute was recently changed by the 1951 Legislature and the News has the necessary forms for proper registration and advertising.

The charge for advertising the notice the necessary four times is \$15.

As amended by the 1951 session, the law reads as follows:

"It shall be unlawful for any person or persons, as defined herein, to engage in business as herein defined, under a fictitious name as herein defined, without and unless said fictitious name shall be registered with the clerk of the circuit court of the county where the principal place of business is, which registration shall consist of filing with the clerk aforesaid an affidavit signed by all interested persons, stating under oath the names of all those interested in the business enterprise, the extent of the interest of each, and the fictitious name under which said business is carried on. Said registration may not be made until the person or persons desiring to engage in business under a fictitious name shall have advertised his or their intention to register said fictitious name at least once a week for four (4) consecutive weeks in some newspaper as defined by law in the county where said registration is to be made, and said registration shall not be accepted by the clerk of the circuit court except upon receiving proof of such publication."

a castle in the air costs nothing
—but you can't live in it!

Make your dream house come true! It's easy
—through Payroll Savings!

If you think you can't own the home of your dreams because the down payment's too steep, chances are you've never tried the Payroll Savings Plan. Because this is the easy, automatic way to meet any down payment—for a house or any large purchase.

Just do this: Sign a Payroll Savings application at your pay office, naming a certain sum to be kept aside from your pay before you get it each week—a few dollars or as much as you want. After that, you're saving automatically—nothing to worry about, nothing to do. And, best of all, the money saved out of your pay each week is automatically invested for you in U. S. Series E Savings Bonds. Because Savings Bonds earn solid interest—3% cumulative continuously when held to maturity.

—the few dollars saved from your pay each week soon grow into big generous amounts. For instance, if you sign for \$12.50 a week, in just five years you'll have \$3,348.95 cash. In 9 years, 8 months, you'll have \$7,217.30!

So don't let down payments get you down. Meet your needs for ready cash the way more than 8 million other Americans are meeting theirs—join the Payroll Savings Plan today. Or, if you're self-employed, invest in Bonds regularly where you bank. Start now to make your dreams come true!

* * *

If you want your interest or current income, ask your bank about Series H Bonds, which pay dividends annually by Treasury check.

Insects & Weeds Cost Millions In Florida Yearly

Not counting cost of control measures, damage caused by weeds to agricultural crops in Florida amounts to about \$100 million a year, reports the July issue of Florida Grower and Rancher. By contrast, insect damage is estimated at around \$56 million each year.

To cut the cost of weeds in your crop you can (1) use good mechanical methods of weed control and good cropping practices, or (2) apply herbicides. The latter is a comparatively new practice in Florida. A 1955 survey by the USDA showed that one out of every 10 acres of crop land in the United States was treated with some herbicide. But in Florida, probably only one out of every 1,000 acres was so treated.

According to the Florida Development Commission, 301 industries are expanding or building new plants in 14 counties of South Florida located in the Central and South Florida Flood Control District.

Earn Auditorium Jax Garden Club

JACKSONVILLE—Ten Dollar Brick Day" was celebrated recently in Jacksonville when 3,300 women each donated \$10 for a total of \$33,000 — enough to purchase bricks for the construction of a new building.

It all started when members of the world's largest garden club, the Garden Club of Jacksonville, figured that \$10 would purchase 141 and two-sevenths bricks. If each member, they reasoned, would donate \$10 enough bricks could be purchased to build an auditorium seating from 800 to 900 people. So the garden club members went to work.

Members were not asked to just donate their ten dollars, it was suggested they earn it. Some members have made items ranging

from food to handicrafts and these items have been sold at weekly bazaars. Others have turned into baby sitters or rented out their barbecue pits to private parties, still others have saved a bit each week from their grocery allowance.

It's all been a lesson in psychology and the ladies of Jacksonville are mighty proud of the job they have done. For the bricks are ready and soon there will be a beautiful new auditorium for the members of the Garden Club of Jacksonville to enjoy.

When Northeast Airlines starts using its new jet planes by the end of 1957, flight time from Miami to New York will be cut to three hours and 15 minutes. The planes, Bristol Britannia's "Whispering Giants" will carry 92 passengers.

*Uncle Sam made the bonds you own
an even better bargain!*

Now your maturing Series E Bonds can earn interest 10 more years at 3%

PRESENT TREASURY REGULATIONS make it possible for you to collect a return of as much as 80% on the Series E Savings Bonds you already own!

For now those Bonds which you invested in 10 years ago can go right on earning interest for ten more years without your doing a thing about it! That is true not only of the Bonds which you have held for ten years, but any other Series E Bonds which you have invested in in the meantime. And any Series E Bonds which you obtain now will also enjoy the extended earning period. They will start earning interest sooner and mature earlier, too, paying 3%, compounded semiannually.

The Bond you got for \$12.75 can now pay you \$33.67 ... a \$37.50 Bond will be worth \$67.34 ... and so on.

Of course, any Series E Bond may still be redeemed at any time after you have held it for two months. But, like any other form of saving, your Bonds will mean a great deal

more to you if you can hold on to them.

Are you one of the millions of Americans who are saving regularly with Savings Bonds through the Payroll Savings Plan? If you're not, why not start now? Invest regularly in Bonds through the Payroll Savings Plan where you work. Ask your pay office to save as little as 25c a week for you, or as much as you are able.

If you can save just \$5 a week regularly through the Plan, in five years you will have \$1,367.90 ... in 9 years and 8 months, you'll have \$2,850.70 ... and in 19 years and 8 months, \$6,872.45! This Plan is one sure way to save because it saves something out of every check before you have a chance to spend it.

So join the Payroll Savings Plan where you work today. Or, if you are self-employed, start the Bond-A-Month Plan where you bank. It's safe, it's sure, it's automatic. And you will be helping yourself and your country!

If you want to be paid
your interest as current income—
invest in 3% Series H

If you want a good, sound investment which pays you your interest by check every six months, ask at your bank about United States Government Series H Bonds. Series H is a new current income Bond available in denominations of \$500 to \$10,000. Redeemable at par after 6 months and on 30 days' notice. Matures in 9 years and 8 months and pays an average 3% interest per annum if held to maturity. Interest paid semiannually by Treasury check. Series H may be purchased at any bank, annual limit \$20,000.

Now even better! Invest more in Savings Bonds!

Atomic Research At State Schools To Cost Millions

TALLAHASSEE—Florida's universities took a look into their atomic futures this week and came up with some interesting, but expensive, predictions.

In fact one school, The University of Florida, submitted a tentative budget over 2 million dollars more than all three institutions could expect for the 1959-61 biennium.

There has been no final action, however on any budget figures and the schools have about a year to get their proposals into shape. Legislators informed the Board of Control that they could expect no more for the next biennium than the \$5,200,000 they were given this biennium for the university nuclear program. But the same amounts don't have to go to the same schools.

In effect the Legislature could cut one school's appropriation in half and give it to the other two, or any other combination it wanted according to the schools' needs. All three institutions have pretty definite programs in mind for the next biennium.

The University of Florida would like to spend \$65,000 for its nuclear library, \$4,113,330 for atomic engineering, (including \$2,500,000 for a reactor), \$1,526,300 for physics research, \$714,600 for atomic chemistry, \$80,500 for radiation biology, \$416,900 for atomic medicine and \$481,400 for nuclear agricultural research.

Florida State will want more money too. A look at its requirements for the 1959-61 biennium shows needs for new buildings,

personnel and equipment in many fields.

The biology department wants \$165,000 for building and equipping a nuclear biology addition to the present biological department will need an additional \$230,000 for a magnetic switching system for the tandem Van deGraaff atomic accelerator bought this year for \$862,000.

The geology department needs funds to purchase a seismograph to "monitor the occurrence of nuclear explosions throughout the world," the chemistry labs will occasionally need new equipment and the food nutrition department said funds will be needed to pay the salaries of additional research assistants.

Florida Agricultural and Mechanical University, which got the smallest appropriation this biennium, \$85,000, will expand its program slowly. The Negro university offers no graduate or major courses in physics which rather limits its needs at the moment.

Tentative plans for the future call for a major course in physics, with training in preparation to obtaining a cobalt-60 radiation source, \$4,000 to equip a physical science shop, \$3,500 to equip a laboratory for "microcurie" measures of radioactivity, and funds to purchase a cobalt-60 source, a pickel-barrel reactor, and photographic equipment for radio-autography.

1500 Gallons Aqua —

(continued from page 1)
water to produce one ton of steel and the farmer needs 10,000 gallons of water to grow a bushel of corn.

Prospects of a water shortage in 1975 when national consumption is predicted to be nearly twice what it is today have alerted the Nation to the water problem. Solutions to the problem of how to save water in wet times for use during periods of drought are being worked out in central and southern Florida. A similar awareness and action to solve the upcoming water problem in apparent nation-wide.

Mr. and Mrs. A. T. Holt and nephews, Franklin and Donald Branch, left Friday for a two weeks' vacation, in the Great Smokey Mountains.

Here's How Keep That Big One From Getting Away

WASHINGTON — Science has given a tip to fishermen on how to prevent that big one from getting away:

Knock him out with an anesthetic drug shot from a water pistol as he thrashes on the hook, or harpoon.

Researchers Perry W. Gilbert and F. G. Wood, Jr. of Cornell University and the Marineland, Fla., research laboratory, reported they had successfully developed such a sneaky technique to capture sharks and rays for use in scientific studies of such things as mating behavior.

In describing use of an anesthetic called "M. S. 222" (nickname for a methan-sulfonate compound) the researchers declared in an article in the technical journal "Science."

"It would appear that this drug and the method of application we have outlined here, might be useful not only to the experimental zoologist but to those concerned with capturing large fish, either for exhibition purposes or for food."

They said the drug does not make the fish flesh unpalatable, and that fish thus anesthetized "have been consumed with no deleterious effects."

Detailing their method for easy handling of big fish, they said a sea-water solution of the drug is introduced into the mouth of a shark or spiracles (breathing holes in the head) of a ray and sprayed over the gill exits "by means of a water pistol, rubber-bulb syringe, or small, pump type hand-sprayer."

"Within 15 seconds," they said, "the M. S. 222 solution begins to take effect and, as a rule, even a

400 pound shark is anesthetized in one minute or less."

Knocked out fish come back from dreamland in five to 30 minutes after being re-immersed in water, depending upon the size of the fish and the dosage received. The knockout effect can be prolonged by another application. Or, indeed, it can be shortened "by washing the gills with fresh sea water—either by 'walking' a large shark, with its mouth kept open, around the (captivity) pool or by directing a stream of fresh sea water into its mouth."

Fruit And Vegetable Quality Guarded By Inspection Services

A great deal of fresh fruits and vegetables can be put in 1,388,663 railroad cars. As a matter of fact, that is the number of carloads of fresh produce that was inspected by Federal and State fruit and vegetable inspectors during 1956.

With watchful eyes, 3,800 licensed men inspect fresh fruits and vegetables at shipping points and terminal markets in all 48 States, Puerto Rico, and Hawaii in the interest of maintaining uniform quality of the produce. The inspection service is especially important to Florida, where vegetables and fruits are principal products.

This service, directed by the Fruit and Vegetable Division of the U. S. Department of Agriculture's Agricultural Marketing Service in cooperation with the States, helps the producer and the shipper get the best possible returns for their products and in turn, guarantees the distributor that he is receiving produce that meets its grade designation.

Besides fresh produce, Federal and State men inspected 462,687 carloads of raw products for processing at many canneries and frozen food plants in 1956.

Except in areas where producers

have adopted Federal or State marketing orders which require that all shipments comply with quality standards, the inspection service is voluntary. The costs of inspection are paid by the producers and shippers (and State appropriations in some cases). In 1956 they paid more than \$10,000,000 for inspection fees.

Photographic reproductions of SeaOrama, the City of Clearwater's marine museum will soon adorn the walls of a French museum. A set of pictures of specimens at the Clearwater museum will be sent to Musee d'Archeologie in Marseilles.

NOTICE TO CONTRACTORS
THE EAST BEACH WATER CONTROL DISTRICT will receive bids up to 9:30 A. M. August 12, 1957 at its office in Canal Point, Florida for:
One Diesel Power Unit with clutch, radiator, starter and all accessories required to connect to and operate a 14,000 GPM Cough Pump now in place at the District Pump Station in Pahokee, Florida, said pump being rated 14,000 GPM against 7 Ft. static head at 600 RPM. Minimum continuous power output of 50 BHP at 1500 RPM, more or less, is required. The bid price shall include installing and furnishing all accessories necessary to make connection to and with existing pump and place in operating condition.
Bidder to consider trade in of present existing pump and all accessories of the premises and the present power unit to be traded in may be made by contacting Carmen Salvatore, Sr., Pahokee, Florida.
The District reserves the right to accept or reject any or all bids.
